Subject: Re: Tax Packages

Gerry

Thank you

The notion of workshops was broader in my view. The same issues you raise relative to BNRT seem to relate to the fuel surtax. I will resend you the proposal on this. The original notion was amended to be a surtax with caps and floors. This is not a new proposal.

The scoring issue remains unaddressed thus the notion of a standardized format for presentation. This will be to you in some detail tomorrow as a follow up on the discussion at the commission meeting.

I agree with your characterization of the local tax issue and how it would be displayed in the recommendations.

Again thank you

Fred
