Subject: gasoline tax

Dear Dr. Ibele:

I hope that you and your commission will seriously consider raising the gasoline tax as part of any tax revisions in our state. Normally I am opposed to regressive taxes, but this one looks like a full-proof way to raise revenue and encourage people to drive less, creating fewer emissions. If you do recommend such a tax, I would hope that you would also consider the impact on lower income tax payers, and recommend a credit of some sort for them.

Thank-you!

Mary Kelly
