**Subject:** Gas tax bill

Hello,

I support the proposed tax bill that will bill:

1. Increase the price of gasoline and most other transportation fuels that are carbon-based by 18 cents per gallon;
2. Establish an annual increase in the tax, based on the California CPI, plus 5%;
3. Restrict the use of these funds to maintenance only, with an express prohibition on any use of these funds for increases in automobile capacity or mobility;
4. (Attempt) to allow some portion to be used for SB 375 (reduce global warming) purposes;
5. Collect this tax at the so-called rack, or refinery level (understanding that it will be passed along to the consumer at the retail level).

I request that this email be posted on the COTCE website under correspondence.

Thank you,  
Geri Lieby
